

DAVIS MAGHANGA KIRUGHAMIO

OBJECTIVE

To create real life applications that can change the lives of people around me through innovation.

SKILLS & ABILITIES

1. **Mastery in frontend design-**
Css3, bootstrap4
2. **Backend programmer** in php
Laravel. -
Fairly good at php Laravel including common CRUD operations and others.
3. **Android UI development** (Java)
I am capable of creating nice user interfaces using xml.
4. **Project Management tools-Slack**
Through software tracking tools such as slack I am capable of providing updates on my project status and be a team player.
5. **Software version control** – Git
GitHub. (Open to other version control tools like bit bucket.)

I am a quick learner, a hardworking, dependable and self-driven individual. My goal is to acquire knowledge, expand it and apply it in providing solutions.

DEVELOPMENT STATUS

Open Source
